

Fun Fyne Features

Andy Williams

@andydotxyz

Playing with Pixels

- Image handling is great in Go!

```
myImage := Canvas.NewImageFromImage(myGoImage)
// edit bits
myImage.Refresh()
```

- Timers

```
c := time.Tick(time.Second / 60)
for range c {
    // do image update, then...
    myImage.Refresh()
}
```

GameBoy (thanks HF04)

Device API

- Device capabilities

```
myDevice := fyne.CurrentDevice()
if myDevice.HasKeyboard() {
    // just show UI
} else {
    // add some touch controls
}
```

- Orientation etc

```
if myDevice.IsVertical() { ... }
```

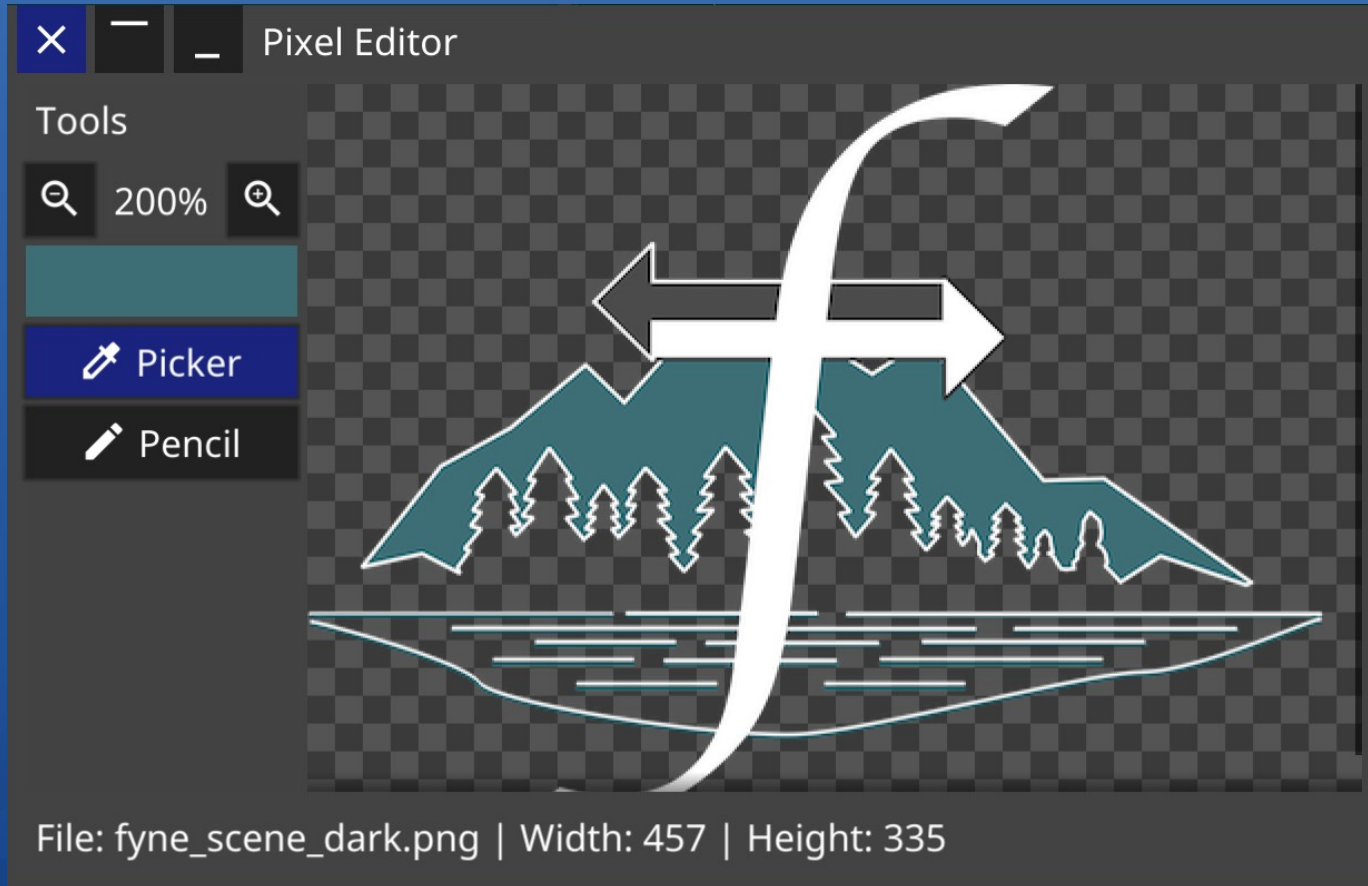

GameBoy on Mobile

Lots built in

- Widget Library
 - Button Hyperlink Icon Label Menu PopUp ProgressBar ProgressBarInfinite Toolbar
 - Check Entry Radio Select Slider
 - Box Form Group Scroller TabContainer
- Unit test all the things
 - `test.Tap(myButton)`
 - `test.Type("this string", myInput)`
 - `img := playground.Render(myWidget)`

Pixel Edit

Themes

- Applications can override standard theme

```
import fyne.io/fyne/theme  
myApp.SetTheme(theme.LightTheme())
```

- Implement fyne.Theme
 - myApp.SetTheme(&myTheme{})

BBC Micro (thanks skx)

The image shows a screenshot of a BBC Emulator window. The window has a title bar that says "BBC Emulator" with a red close button on the right. The main area is a dark grey rectangle with a black border, containing text in a monospaced font. The text shows the system booting into BASIC and then executing a simple program that prints "Hello" three times and "Fyne!".

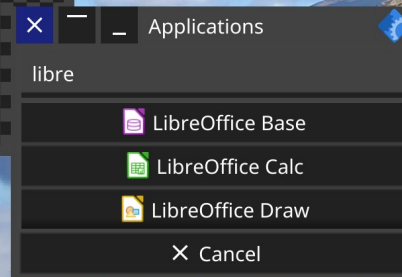

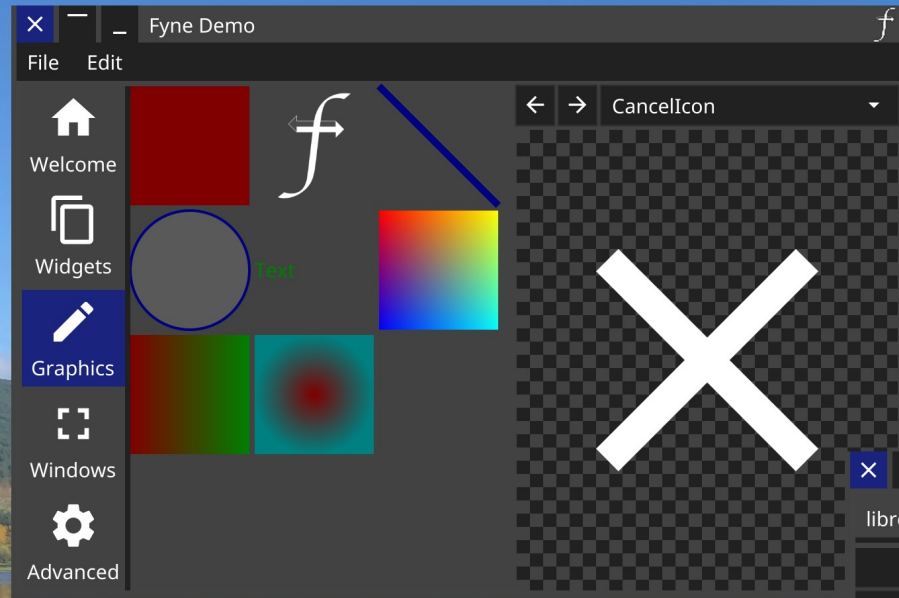

```
BBC Computer 65184K  
Linux DFS  
BASIC  
  
>10 REM A simple program  
>20 FOR X=1 TO 3  
>30   PRINT "Hello " X  
>40 NEXT X  
>50 PRINT "Fyne!"  
>RUN  
Hello 1  
Hello 2  
Hello 3  
Fyne!  
>_
```

All the Go Libraries!

- So many great open source libraries
 - Cross platform by default
- But also solid tools for platform specifics
 - Like ...
 - Window managers?
 - System control?
- FyneDesk!

12 December

Q Applications

100%

15%

 andy

Compiling for ...

- Running
 - `go run .`
- Install on my desktop
 - `go get fyne.io/fyne/cmd/fyne`
 - `cd myapp`
 - `fyne install`
- Distribute for desktop
 - `fyne package`
- For Mobile ...
 - `fyne package -os ios -appID com.example.myapp`

Cross Compiling for ...

- macOS / Linux / Windows / BSD / RaspberryPi
 - Install all the toolchains!
- *Or*
- Fyne Cross
 - <https://github.com/lucor/fyne-cross>

Thanks!
